# Huddly S1

# For huddle, small and medium rooms.

# Huddly S1 Product Information

86 mm / 3.4 in

### Specifications

#### Image

- 4K image sensor
- · 12 Megapixels 1/2.3" CMOS sensor
- 1080p Full HD @ 30 fps
- · 720p HD @ 30fps
- 16:9 aspect ratio output
- Up to 4x digital zoom

#### Optics

- · Ultra-wide angle glass optics
- Horizontal field of view 120°
- Vertical field of view 90°
- Diagonal field of view 150°
- f/2.8 aperture

#### System & Hardware Requirements

- Windows 10
- Huddly USB to PoE Adapter (included)

#### Connectivity

- Connector: RJ45
- · Cable: Cat 5e/6/7
- USB 3.0 port (via USB to PoE Adapter)

#### Hardware

- High-performance VPU with neural compute engine
- Aluminum body
- Camera tripod mount

#### Color

Matte Black

#### Wall & Shelf Mount (Included)

- · Made for placement on wall or shelf
- Weight of Mount: 120 g/ 0.2 lbs

#### **Packaging Dimensions**

L: 274 mm x W: 184 mm x H: 93 mm

# Huddly S1 Product Information

### Features

#### **Genius Framing**

The camera detects the people in its entire field of view and intelligently frames them for the best experience.

#### Digital Pan/Tilt/Zoom

The camera has no moving parts, allowing Pan, Tilt, and Zoom functions to be adjusted smoothly, silently and instantly.

#### Software-Upgradable

The camera gets even smarter over time with regular software enhancements and new intelligent features.

#### **Power over Ethernet**

The camera receives power and transmits data through Power over Ethernet. Installation is reliable and flexible in regard to cable length.

#### Image Enhancement

The camera automatically corrects white balance, color, and optical aberration. It reduces image noise through bias compensating spatio-temporal filtering with wide-area chroma filtering and adapts to poor lighting conditions with Dynamic Light Optimization.

#### **Real-Time Dewarping**

The camera's wide-angle image is dewarped and perspective corrected in real time, rendering a natural, true-to-life view.

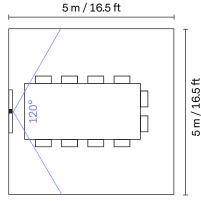

#### **Portrait Lighting**

The camera uses AI to understand the lighting conditions in the image. It automatically adjusts exposure to ensure that faces are well-lit and facial expressions are clearly visible.

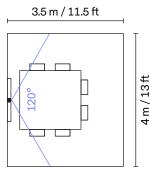

#### InSights Analytics API

The camera can detect and count the people within its entire field of view, with high-quality analytics data accessible via the Huddly InSights API.
